	6.8 Infectious disease: bacterial –	•	•
ince of dominant KEGG terms	6.7 Endocrine and metabolic disease –	•	•
	6.12 Drug resistance: antineoplastic –	•	•
	6.11 Drug resistance: antimicrobial –	•	•
	6.1 Cancer: overview –	•	•
	5.9 Aging –	•	•
	5.2 Endocrine system –	•	•
	5.10 Environmental adaptation –	•	•
	4.5 Cell motility –	•	•
	4.4 Cellular community – prokaryotes –	•	•
	4.2 Cell growth and death –	•	•
	4.1 Transport and catabolism –	•	•
	3.2 Signal transduction –	•	•
	3.1 Membrane transport –	•	•
	2.4 Replication and repair –	•	•
	2.2 Translation –	•	•
	2.1 Transcription –	•	•
nda	1.9 Metabolism of terpenoids and polyketides –	•	•
Relative abundance	1.8 Metabolism of cofactors and vitamins –	•	•
	1.7 Glycan biosynthesis and metabolism –	•	•
	1.6 Metabolism of other amino acids –	•	•
	1.5 Amino acid metabolism –	•	•
	1.4 Nucleotide metabolism –	•	•
	1.3 Lipid metabolism –	•	•
	1.2 Energy metabolism –	•	•
	1.11 Xenobiotics biodegradation and metabolism –	•	•
	1.10 Biosynthesis of other secondary metabolites –	•	•
	1.1 Carbohydrate metabolism –		
	1.0 Global and overview maps –		
	"2.3 Folding, sorting and degradation" –	•	•
